

ACTIVATED TITANIUM MMO ANODES

STRIP ANODES

Anode Ref.	Width (mm)	Length (mm)	Height (mm)	Output (A)	Anode surface (m ²)	Lifetime (years)
ATMMO 12	25	500	3	1.2	0.025	20
ATMMO 24	25	750	3	2.4	0.037	20
ATMMO 40	25	1000	3	4.0	0.050	20

Standard coating: 100 A/m².

All kinds of strip anodes can be delivered upon request with:

- XLPE/PVC or Kynar HMWPE cable
- In canister with carbonaceous backfill

Anode characteristics:

Environnement	Current density	Lifetime (years)
Soil	50 A/m ²	20
With carbonaceous backfill type Loresco SC2	100 A/m ²	20
Fresh water	100 A/m ²	20
Brackish water	100-250 A/m ²	20
Sea water	580 A/m ²	20

Other types of MMO anodes available:

- Tubular anodes - application: soil / fresh water / brackish water / sea water
- Wire anodes - application: fluids / concrete / soil
- Mesh anodes - application: concrete / electro osmosis
