

BORIN STELTH 2

Reference Electrode for Underground & Concrete Service

- Size: 1,5" (4 cm) Diameter x 7" (18 cm) long.
- Lead wire: 50' (15 m) of #14 (2,5 mm²) – RHH-RHW wire.
- Material: Ceramic with mixture Retention Membrane.
- Stability: 5 milivolts with 3.0 microamps load.
- Temperature range: -10° to 176°F (-23° to 80°C).

Exclusive Stelth features:

- Minimum 20 year service life.
- 8 square inches of sensing surface gives you 5-8 times more surface area than other electrodes.
- Will not dry out in desert dry soil, a condition that renders other electrodes ineffective. The Stelth 2 will not be destroyed by absolute dry soil conditions, it will lie dormant until moisture returns.
- Electrodes may be taken out of service for extended periods of time and reintroduced into the system without affecting electrode accuracy or ability to reactivate (electrode will fire up in under 5 minutes).
- Available in three models: SRE-007-CUY (Cu/CuSO₄) – SRE-008-SUB (Ag/AgCl) – SRE-009-ZUR (Zn/ZnSO₄).
